

FY2009 Q2 October 1, 2008-December 30, 2008

Estimated number of jobs created or retained:

- 659 technical crew and office jobs
- 123 talent jobs
- We do not track vendor jobs. Any given project will use hundreds of vendors and we do not track how many employees of a particular vendor work on each project.

Estimated amount of film production spending brought to Illinois:

- \$ 4,549,847.00
- Type of vendors hired includes caterers, janitorial service companies, security companies, and florists. Type of vendors for materials used in film productions and production services include lumber yards, hardware stores, fabric stores, clothing companies, grocery stores, gasoline stations, hotels, restaurants, parking garages, office rentals, stage rentals, computer rentals, insurance companies and legal services to name a few.

Whether or not the human infrastructure reflects diversity of the state of Illinois:

- The film tax credit has a diversity requirement attached to it which means that no production will receive the tax credit without proof of a best faith effort to hire women and minorities as part of the technical crew and office staff. Because a company has two years in which to claim a tax credit and provide their final hiring numbers, we do not yet know whether or not each FY 2009 Q2 production has satisfied the requirement.
