### **Gallagher Corporation Receives Osha Award For Exemplary Workplace**

GURNEE -- The Department of Commerce and Economic Opportunity (DCEO) today announced that Gallagher Corporation is one of only 10 Illinois companies to qualify for participation in the U.S. Department of Labor, Occupational Safety and Health Administration's (OSHA) Safety and Health Achievement Recognition Program (SHARP).

The company undergoes a detailed inspection of their facility by safety and health consultants from DCEO to ensure the company's safety and health management program is effective. The consultation program provides no-cost assistance to identify safety and health hazards, correct the hazards that are identified, and to develop and implement safety and health programs.

"By publicly recognizing participants in SHARP, our hope is that other employers will follow their example in providing the safest working environment they can for their employees," said DCEO Director Jack Lavin. "Gallagher Corporation is one of these companies that has demonstrated a sincere commitment to providing a safe workplace for their employees."

Gallagher Corporation has worked with DCEO's consultation program since 1994 and has been a participant in the recognition program since 1995. The company presently employs 60 people and manufactures polyurethane and plastics products for the railroad, agriculture and construction equipment industries.

SHARP was established to publicly recognize the safety and health achievements of exemplary employers. The program provides incentives and support to smaller, high hazard employers to improve the effectiveness of their workplace safety and health programs. Effective

implementation of safety and health management programs has been shown to result in immediate and long term prevention of job-related injuries and illnesses, which produce significant operating cost savings for employers.
